

CERASHIELD 7 MICRON

PAINT | GRP | GEL-COAT

PROPERTIES / PRODUCT DESCRIPTION

HIGH GLOSS

CeraShield 7 Micron coating solution protects smooth, non absorbent surfaces against salt spray, acid rain staining, UV & weathering. 7 Micron forms a permanent barrier layer that bonds chemically with the substrate curing at room temperature and atmospheric humidity.

EASY CLEANING

A surface protected with CeraShield 7 Micron can be cleaned repeatedly without degrading the coating.

REDUCED MAINTENANCE

CeraShield 7 Micron is suitable for polished, non absorbent surfaces such as two-component paints, GRP and gel-coat.

REDUCED CLEANING TIMES

APPLICATION

Wipe on Wipe Off

PROTECTION AGAINST:

UV & WEATHERING

ACID RAIN

BIRD LIME

EXHAUST STAINING

DIRT & CONTAMINANTS

TECHNICAL DATA

UV: Stable

Binder base: Organic Silane/SiO₂

Thickness cured: 5-7um

Compatibility: Matte and gloss surfaces (always apply a test patch)

Hardness: up to 9H

Appearance: Clear/Colourless liquid

Solvent base: Low VOC

Application: Wipe on wipe off

Gloss Levels: High on gloss surfaces

Multiple coats: Yes

Container sizes: 30ml, 50ml, 100ml, 250ml

To recycle, wipe out the bottles with a cloth, when empty leave, without lid, for 24-48 hrs to allow any excess to cure off. Then recycle the aluminium bottles.
