

CeraShield[®]

CERASHIELD GLASS COAT

ALL GLASS SURFACES

PROPERTIES / PRODUCT DESCRIPTION

INCREASED VISIBILITY

CeraShield Glass Coat is a coating solution that protects glass surfaces against acid rain, bird lime, dirt & weathering. Due to its hydrophobic properties water beads off the treated surfaces and protects them from calcium and salt marks. CeraShield Glass Coat is a low maintenance coating that prevents contaminants from bonding to the surface and limits further damage caused by corrosion & weathering.

EASY CLEANING

The surface protected with Glass Coat has very good durability allowing general dirt, contamination to easily be removed using normal washing procedures. Glass Coat forms a barrier layer that covalently bonds with the substrate curing at room temperature and atmospheric humidity.

REDUCED MAINTENANCE

CeraShield Glass Coat is suitable for all glass surfaces.

REDUCED CLEANING TIMES

PROTECTION AGAINST:

SALT MARKS

CALCIUM STAINS

UV & WEATHERING

ACID RAIN

BIRD LIME

DIESEL & CONTAMINANTS

APPLICATION

Wipe on Wipe Off

TECHNICAL DATA

UV: Stable

Appearance: Clear/Colourless liquid

Thickness cured: ~0.5-1.5um nominal **Application:** Wipe on wipe off

Compatibility: All glass surfaces
(always apply a test patch)

Container sizes: 30ml, 50ml, 100ml, 250ml

To recycle, wipe out the bottles with a cloth, when empty leave, without lid, for 24-48 hrs to allow any excess to cure off. Then recycle the aluminium bottles.
