# CERASHIELD GLASS POLISH

## ALL GLASS SURFACES

**WATER BASED**

**CERIUM OXIDE COMPOUND**

**HAND & MACHINE APPLIED**

**REMOVES STAINING FROM:**

ACID RAIN

BIRD LIME

CALCIUM

SALT

### PROPERTIES / PRODUCT DESCRIPTION

CeraShield Glass Polish has been developed and tested to provide your glass surfaces with a great shine free from contaminants allowing for the CeraShield ceramic coating solutions to be applied over the top to help protect the glass surface from harsh bird lime, acid rain, salts and calcium deposits.

### APPLICATION

For best results and ease of use apply the CeraShield Glass Polish to the surface using specialist felt pads which allow for the easy and fast removal of bird lime, acid etching, calcium deposits and salts. For more intricate areas apply the polish using soft microfibre cloths by hand.

### TECHNICAL DATA

**Appearance:** Orange

**Application:** Machine or hand applied

**Gloss Levels:** High Shine

**Consistency:** Paste/Cream

**Compatibility:** Glass Surfaces (always apply a test patch)

**Active Ingredient:** Cerium Oxide

**Container sizes:** 250ml, 500ml, 1L, 5L

Our black bottles are made with PET plastic and suitable for recycling. To recycle the aluminium bottles, wipe out the bottles with a cloth, when empty leave, without lid, for 24-48 hrs to allow any excess to cure off before recycling.
