

# CERASHIELD METAL COAT

## METAL SURFACES

### HIGH GLOSS

CeraShield Metal Coat coating solution protects all types of metal against salt spray, diesel staining, acid rain staining, oxidation, pitting & UV. Metal Coat forms a permanent barrier layer that bonds chemically with the substrate, curing at room temperature and atmospheric humidity.

### EASY CLEANING

The surface protected with CeraShield Metal Coat can be cleaned repeatedly without degrading the coating.

### REDUCED MAINTENANCE

Metal Coat is suitable for all types of metal including chrome.

### APPLICATION

### REDUCED CLEANING TIMES

Wipe on Wipe Off

### PROTECTION AGAINST:

UV & WEATHERING

ACID RAIN

BIRD LIME

DIESEL STAINING

PITTING

### TECHNICAL DATA

**UV:** Stable

**Binder base:** Organic Silane/SiO<sub>2</sub>

**Thickness cured:** ~2-5um nominal

**Compatibility:** Matte and gloss surfaces (always apply a test patch)

**Hardness:** 6-9H

**Appearance:** Clear/Colourless liquid

**Solvent base:** Low VOC

**Application:** Wipe on wipe off

**Gloss Levels:** High on gloss surfaces

**Multiple coats:** Yes

**Container sizes:** 50ml, 250ml

To recycle, wipe out the bottles with a cloth, when empty leave, without lid, for 24-48 hrs to allow any excess to cure off. Then recycle the aluminium bottles.
